(54) Title: CHAIN MODULAR AND MODULAR CHAIN CONVEYOR

(57) Abstract: A chain module (1) for a modular chain conveyor, comprising a substantially sheet-shaped body part (2), provided with a conveying surface (3) located at an upper side of the body part (2), with hinge holes (4A1, 4A2, 4B) included in the body part (2) and with two projections (15A, 15B) provided at the underside (14) of the body part (2), wherein sliding faces (17A, 17B) located at the sides (16A, 16B) facing each other of the projections (15A, 15B), together with a sliding face (18) located between the projections (15A, 15B) at the underside (14) of the body part (2), form a guide with substantially U-shaped cross section. The projections (15A, 15B) have been provided at a distance from sides (7, 8) of the body part (2) and adjacent the projections (15A, 15B) at the underside (14) of the body part (2), sliding faces (19A, 19B) are located, each forming, with sliding faces (19A, 19B) located at sides (20A, 20B) facing away from each other of the projections (15A, 15B), a longitudinal guide with substantially L-shaped cross section.
